Source partners with Zapmap to reach over 1,000,000 EV drivers

Zapmap users can now pay directly at Source's UK ultra-rapid charging hubs

Innovative new EV charging company Source has joined Zapmap as a payment partner, giving EV drivers another way to pay at Source's ultra-rapid charging hubs across the UK.

Zapmap users can add a credit or debit card to their account and use it to pay for EV charging, providing a simple way to pay across over 80,000 chargers across more than 50 networks from within the familiar Zapmap app, or with a tap of the Zapmap charging card.

Drivers paying with Zapmap are also able to view their charging history, receive live status updates and download receipts to track their spending. They can also use both Apple Pay and Google Pay on all devices that accept payment through Zapmap.

Source plans to open 300 ultra-rapid charging hubs across the UK and Ireland by 2030. All hubs feature at least 150kW chargers, allowing drivers to add substantial range in around 15 minutes for most vehicles.

Every Source hub is built around a 99%+ uptime target, backed by smart monitoring and real-time availability updates so drivers can check a charger's status before arriving. Sites are powered by renewable energy and support contactless payment as standard.

Alice Aprile-Smith, Head of Partnerships and Business Development at Source, said:

"Since launching in 2025, we've focused on giving drivers as many straightforward ways as possible to charge with us. Joining Zapmap as a pay partner puts our ultra-rapid hubs in front of its community of more than a million engaged EV drivers, and gives them one more simple way to pay when they charge with Source."

Melanie Shuflebotham, Co-founder and COO, Zapmap, said:

"We're delighted that Zapmap is now a part of Source's focus on ensuring that charging is as straightforward and accessible as possible for all: a great result for both current and future EV drivers."

"As the network continues to grow, Zapmap users will be able to locate Source chargers, view live availability status, alongside pricing and community feedback as well as now having the option to pay via the app or charging card."

The partnership adds to the growing number of ways Source is making public EV charging easier for drivers, from its network of roaming partners to the SourceConnect app, which lets

users locate available hubs in real time, start a charge by scanning a QR code, and track their session live.

Notes to editors**About Source**

Source is an innovative Charge Point Operator, a collaboration between SSE and TotalEnergies, dedicated to revolutionising the electric vehicle (EV) charging landscape in the UK and Ireland. With a mission to establish the most reliable and accessible charging network, Source places sustainability at its core, utilising renewable energy and promoting ecological well-being at each hub.

Our ultra-rapid chargers provide efficient and quick charging, ensuring that EV drivers have access to market leading technology and convenience. Our network is designed with customer satisfaction in mind, featuring easy-to-use interfaces and real-time availability updates. We prioritise safety with well-lit, secure charging stations and continuous monitoring to uphold the highest standards of service.

Source's commitment to excellence is reflected in our strategic hub locations, ensuring that drivers have access to charging wherever their journeys take them. By focusing on creating stress-free and seamless charging experiences, Source is leading the way towards a cleaner, more connected future for all communities.

"Clean, Connected Communities."

About Zapmap

Zapmap was founded in 2014 with a mission to to accelerate the transition to low emission mobility by helping people switch to electric vehicles. The Zapmap app helps EV drivers find and pay for public charging with confidence and has over one million registered users. This is powered by Zapmap's charger data with unrivalled coverage, detailed information and 24/7 live availability data.

An integral part of supporting the wider EV industry, Zapmap Insights is the leading source of EV charging data and insights, providing unrivalled data and expert analysis into the shape and usage of EV charging infrastructure, as well as the attitudes and behaviours of EV drivers.
